## **PATIO REQUIREMENTS FOR LIQUOR LICENSE HOLDERS**

Minnesota §340A.410 subd.7 requires a liquor license may be issued only for a space that is compact and contiguous. The building and any permanently constructed and physically attached deck or patio is recognized as a part of the compact and contiguous licensed premises. The area must be included as part of the licensed premises on the applicant's liquor license application in the section that describes the licensed premises and must be covered by liquor liability insurance.

The area must have a fence that is six (6) feet high and have secure, controlled access preferably through the restaurant. The fence should have a gate with a lock. No one should be able to enter from the outside gate. Storage of alcoholic beverages is not allowed on the attached deck or patio. An application will not be reviewed by city council until an application is submitted to the City Clerk and site plans have been approved by Environmental and Economic Department.
