

To Whom it May Concern:

Using the Bruce Vento Trail for public transportation is a terrible idea. Instead, concentrate on fixing existing roads and utilize Hwy 61 or White Bear Avenue or McKnight with an Express Lane for busses.

I find it incomprehensible that converting a trail into public transportation is even under consideration. Other communities nixed the plan all together. I hope our local representatives have the smarts to do likewise. It could be a short meeting to say NO! Please!!!
