Revised 05/2021

FILING REQUIREMENTS

Lot divisions will only be approved if the City's subdivision requirements are met.

You must provide all of the following items with your application:

- Five (5) copies of a drawing drawn to a scale or a certified land survey showing the following (and at least one drawing must be 8 ½ " x 11" drawn to scale):
 - The scale to which the drawing is drawn.
 - A north arrow.
 - The legal description of the land you want to divide.
 - Existing street rights-of-way, railroad and utility rights-of-way, parks and other public open space, permanent buildings and easements within the existing lot and within 100 feet of the lot.
 - Proposed split line(s).
 - The dimensions of all property lines.
 - The proposed use and area of each new lot.
 - The location and widths of proposed utility easements.
 - Areas, other than streets and utility easements, that you intend to dedicate for public use, including their areas.
 - The location of any City-designated shoreland boundaries. Contact a City planner for locations and development restrictions.

Note: A certified land survey is not required upon submittal of the lot division application, but will be required prior to the City signing your lot division deeds. The City requires most new lots to have drainage and utility easements located on the front and rear ten feet and the side five feet of the lot. These easements must be reflected on the survey. Please contact the Engineering Department at 651-249-2400 with questions regarding utility and drainage easements. In addition, the City requires a certificate of survey reflecting the location of the building for all new construction prior to issuance of a building permit.

- An application fee of \$500 is required to split a parcel into three or fewer lots. The creation of four or more lots requires a preliminary plat application, not a lot division application. **This fee is non-refundable.** Make your check out to the City of Maplewood.

NOTES

- Try to discuss your proposal with adjacent property owners before a formal application is made. Any conflicts that you can resolve ahead of time will make it easier and faster for the City to process your application.

- Filling or excavating a wetland may require a permit from the watershed district, Minnesota Department of Natural Resources or the U.S. Corps of Engineers. These permits are your responsibility to obtain.
- Contact the Building Department at 651-249-2300 for building permit fees. Contact the Engineering Department at 651-249-2400 for sewer, water and park availability charges and for pending, levied or deferred assessments or cash connection charges. Any outstanding assessments or required cash connection fees must be paid before the City signs the lot division deeds. All other fees are required before a building permit will be issued.
- Refer to the City subdivision ordinances for lot standards. (Copies are available from the Community Development Department.)

PROCEDURE

- Return this application to:

Community Development Department
1902 County Road B East
Maplewood, MN 55109
- City staff will review your request administratively, with no formal City hearings required unless a variance is needed. This process generally takes one month.
- City staff will send you a letter informing you whether your application has been approved or not. The letter will explain all conditions of approval.
- After you have completed all the conditions for approval, you may bring your survey (if the property is to remain in your possession) or warranty deeds (if the property is to be deeded to someone else) to the Community Development Department for a city planner to sign. You will then be required to record the survey or the deeds with Ramsey County. The County will not accept a survey or deed for recording unless someone from the City has signed it and all property taxes for all the properties have been paid for the entire year. Verification of county recording of the lot division is required prior to the City issuing a building permit for the new lot.
